CONSTRUCTION AND RENOVATION STANDARDS

SECTION 08800 - GLASS AND GLAZING

PART 1 - GENERAL

1. As part of any renovation or new installation of glass, all work shall be done according to the National Glass Association Glazing Reference Guide. This Guide is part of the BOCA Code.
2. Distortion of glass is unacceptable; provide appropriate glass thickness and intermediate air space in sealed insulated units to ensure maximum deflection of exterior light that does not exceed $L/1000$ of the narrow dimension based on standard barometric pressures and temperatures for this geographic region, as well as the installation elevation relative to conditions at time of manufacture/sealing of units.
3. Provide a ten (10) year minimum warranty on insulated glass units.
